

Introduction to Medicare: Hospital Perspective

Suzanne H. Butch, MA, MLS(ASCP)SBB^{CM}, DLM^{CM}, CQA(ASQ)

Michigan Medicine
butchs@umich.edu

Objectives

- Describe the Medicare program and payment policies.
- Explain general reimbursement principles related to transfusion medicine services and blood products.
- Explain basic reimbursement principles related to cellular therapies.

What Should the Transfusion Service Manager Know About Billing

1. What are P, CPT, HCPCS, Revenue and ICD-10 Codes
2. How does billing work at your facility
 - How the transfusion service computer system assign internal and CMS billing codes
 - What happens to the billing after it leaves the transfusion service software
3. What percentage of patients are on Medicare and private pay

More - What to Know

4. How much of what you bill is for outpatients?
5. How is the cost of a product or service determined and a price set in your facility
6. How to search the internet for billing information:
CMS, AABB, CAP

Definitions

- DRG – a statistical system of classifying any inpatient stay into groups for the purposes of payment
- APC – Used for outpatient billing
- Revenue Code – used for inpatient billing

Diagnosis Related Group (DRG)

- A statistical system of classifying any **inpatient** stay into groups for the purposes of payment
 - [D60](#) Acquired pure red cell aplasia [erythroblastopenia]
 - [D61](#) Other aplastic anemias and other bone marrow failure syndromes
 - [D62](#) Acute posthemorrhagic anemia
 - [D63](#) Anemia in chronic diseases classified elsewhere
 - [D64](#) Other anemias

Revenue Code

- Used for inpatient billing
 - 30x Laboratory-Clinical
 - 300 General
 - 301 Chemistry
 - 302 Immunology
 - 303 Renal Patient (home)
 - 304 Non-routine Dialysis
 - 305 Hematology
 - 306 Bacteriology & Microbiology
 - 307 Urology
 - 309 Other Laboratory

Ambulatory Procedure Codes (APC)

- 0110 Transfusion
- 0111 Blood Product Exchange
- 0112 Apheresis, Photopheresis, and Plasmapheresis
- 0123 Bone Marrow Harvesting and Bone Marrow/Stem Cell Transplant
- 0954 RBC leukocytes reduced
- 1017 Platelets, aph/pher, L/R, CMV-neg, unit
- 1019 Platelets, aph/pher, L/R, irradiated, unit

Modifier

- Modifier – added to HCPCS code
- Modifier 90 – Referred Tests
- Modifier 91 - Repeat Tests
- QW – Waived test

Three Levels of HCPCS

- Level I codes - **AMA's CPT codes** and is numeric
- Level II - alphanumeric code set primarily non-physician products, supplies, and procedures not included in CPT
- Level III codes - “HCPCS local codes” developed by state Medicaid agencies, Medicare contractors, and private insurers for use in specific programs and jurisdictions

HCPCS Billing Codes

- Laboratory Procedure Codes – CPT Codes
- Blood Components – P Codes
- Procedure Codes – Service Codes

P Codes

Table 1. Blood and Blood Products								
HCPCS Code	Short Descriptor	2019 SI	2018 APC	2019 APC	Final 2018 Payment ¹	Proposed 2019 Payment	\$ Change 2018-2019**	% Change 2018-2019**
P9010	Whole blood for transfusion	R	9510	9510	\$156.91	\$123.59	-\$33.32	-21%

Reimbursement

Payer	Inpatient	Hospital Outpatient
Medicare	DRG Based prospective payment	APC or ASC classification
	Revenue Codes, ICD-10	CPT, HCPCS, ICD-10

Scenario 1

- A patient receives two units of leukocyte reduced red blood cells on the same day as the type and screen and electronic crossmatch.
- What “billing” does the transfusion service send to the hospital computer system?
 - A inpatient
 - B outpatient

Scenario 1 – CPT Codes for Outpatient

- 86900 x 1 ABO
- 86901 x 1 Rh
- 86850 x 1 Antibody Screen
- 86923 x 2 Electronic crossmatch
- P9016 x 2 Red Blood Cells Leukocyte-reduced
- **36430 x 1 Transfusion fee?**

Inpatient Bill

Revenue Code	Description	Amount
0300	General Laboratory	004 (ABO, Rh, AS, XM)
0391	Blood Processing and Administration	001 (Infusion fee)
0390	Red Blood Cells	002 (blood component)

Scenario 2

- Three units of leukocyte reduced irradiated red cells are crossmatched for a patient. Two of the three units are transfused. An Apheresis Leukocytereduced Irradiated Platelet is also transfused.
- What “bill” is issued from the transfusion service?

Scenario 2 CPT Codes for Outpatient

- 86900 x 1 ABO
- 86901 x 1 Rh
- 86850 x 1 Antibody Screen
- 86923 x 3 Electronic crossmatch
- P9040 x 2 red Blood Cells Leukocyte-reduced
- P9033 x 1 Apheresis leukocyte-reduced platelet
- **36430 x 1 Transfusion fee?**

Inpatient Bill

Revenue Code	Description	Amount
0300	General Laboratory	006 (ABO, Rh, AS, 3-XM)
0391	Blood Processing and Administration	001 (Infusion fee)
0390	Red Blood Cells Platelets	002 (blood component) 001

Pathogen Reduction /Testing Changes

- CMS deactivated the use of code P9072 for the Medicare program, and established two new codes, Q9987 and Q9988.
- Q9988 (platelets, pheresis, pathogen reduced, each unit) is a product code
- Q9987, pathogen test(s) for platelets is separately payable testing code

Change Billing Date for Molecular

- 42 C.F.R. § 414.510(b) to establish that in the case of a molecular pathology test ... that meets the criteria of Section 1834A(d)(5)(a), **the date of service must be the date the test was performed (the date of final report).**
- **Problem:** The testing agency bills Medicare directly.
- **Question:** Does this apply to blood centers?

Billing Problem Areas

- Electronic Crossmatch
- Split Units
- Directed Donor Units
- Autologous Units
- Units transported with patients
- Antigen typing
- How much should I charge for blood

Electronic Crossmatch

- Cannot bill with any other type of crossmatch
- Serologic Crossmatch
 - Bill for each phase performed and documented

Split Units

- Regardless of the component, the P code for the split product is P9011 (Blood, split unit)
- CPT 86985 may be used to bill for the process of splitting each unit each time it is done, cannot bill for the last part if it is not put in a syringe or bag as it was not “split”
- DO NOT bill any other blood component “P” code

Directed Donor Units

- Bill for the product transfused as usual product “P” code
- There are no special CPT codes or “P” codes for additional “Directed Units” fees

Autologous - Transfused

- If the blood WAS transfused
 - Use Revenue Code 039X (0391 an option)
 - Bill CPT 36430 Transfusion Fee
 - P code for the product

Autologous – Not Transfused

- If the blood was NOT transfused
 - Use Revenue Code 039X (0391 an option)
 - Bill CPT 86890 (predeposit)
 - Do not bill a P code for the product
 - Do not bill Transfusion Code 36430

Service Date for Billing Autologous

- If transfused
 - Use the date of transfusion times the number of units transfused
- If not transfused
 - Use the intended date of transfusion times the number of units not transfused

Antigen Typing of Donor Units

- Bill per individual unit
- 86902 antigen screening for compatible blood using reagent serum, per **antigen** screened
- 86904 antigen screening for compatible unit using patient serum, per unit screened

Which Patient Gets Billed?

- If antigen typing is done on one patient but the units are given to another patient who also needs antigen negative units, who gets billed?
- Ans: The first patient or the second patient **but not both**
- Whoever told you life was fair lied.

Who Pays for Blood Wasted During the Transport of a Patient?

- Cannot bill the patient for wasted units
- Add the cost of outdated units to the overhead
- Receiving facility may accept unused units into inventory if properly stored until arriving in the blood bank

How much do I charge for Blood Components?

- It is not just what it cost from the supplier
- Answer: What it costs you to provide the product
 - Cost from blood supplier
 - Cost of waste
 - Processing
 - Handling
 - Dedicated equipment
 - Overhead (power, non-dedicated equipment)

What Should the Transfusion Service Manager Do

1. Review billing annually with hospital billing office to ensure billing is coded correctly
2. Make billing changes based on new information from CMS
3. Review denied claims
 - Billing errors
 - New interpretations

Resource

The screenshot displays the AABB website's navigation and content. At the top, the AABB logo is accompanied by the tagline 'Advancing Transfusion and Cellular Therapies Worldwide'. The navigation bar includes links for 'Find a DNA Lab', 'Give Blood', 'Marketplace', 'Log In', and a shopping cart with '0 Items'. A search bar is positioned on the right. Below the navigation bar, a red banner contains links for 'About AABB', 'Contact Us', 'Calendar of Events', 'Press', and a 'JOIN' button. The main navigation menu is divided into sections: 'STANDARDS & ACCREDITATION', 'PROGRAMS & SERVICES', 'ADVOCACY' (which is highlighted), 'PROFESSIONAL DEVELOPMENT', 'RESEARCH', and 'MEMBERSHIP'. The 'ADVOCACY' section is further divided into 'Billing and Reimbursement Initiatives', 'Regulatory Affairs', 'Statements', 'Comments', 'Correspondence', 'Regulatory and Public Meetings', and 'Stop the Bleed'. The 'Billing and Reimbursement Initiatives' page is the active page, showing a breadcrumb trail: 'Home > Advocacy > Billing and Reimbursement Initiatives'. The page title is 'Billing and Reimbursement Initiatives'. The main content area states: 'AABB is committed to seeking enhanced and fair reimbursement for blood products, and transfusion services and cellular therapies through both education regarding the complexities of blood coding and billing, and advocacy to reimbursement policy makers.' Below this, there are links for 'News' and 'Reimbursement Advocacy'. The 'News' section features a headline: 'AABB, America's Blood Centers and the American Red Cross Submit Joint Comments on Proposed Medicare Hospital Outpatient Payment Rates and Policies for 2019'. The text below the headline states: 'AABB, America's Blood Centers and the American Red Cross submitted joint comments to the Centers for Medicare & Medicaid Services (CMS) in response to the proposed rule updating Medicare payment policies and rates for hospital outpatient services for 2019. The organizations highlighted that the proposed reimbursement rate for pathogen reduced platelets is erroneous, and requested that CMS clarify the...'. On the right side of the page, there are two sidebars. The first sidebar is titled 'AABB Resources' and contains links for 'AABB Billing Guide', 'Billing for Blood and Transfusion Services FAQ', and 'Print'. The second sidebar is titled 'External Resources' and contains links for 'CMS Outpatient Billing Guidance for Blood Products and Services', 'CMS Billing Guidance for Stem Cell Transplants - Inpatient', 'CMS Billing Guidance for Stem Cell Transplants - Outpatient', 'CMS Transmittals', and 'CMS Manuals'.

Faculty Disclosure

(In compliance with ACCME policy, AABB requires the following disclosures to the session audience)

- No disclosures to report.

Objectives

- Establish a basic understanding of the Medicare program
- Understand Medicare hospital inpatient payment policy
- Understand Medicare hospital outpatient payment policy

“Ready to walk the Reimbursement Maze?”

AABB Antitrust Policy

- AABB complies with all applicable antitrust laws and regulations.
- Accordingly, discussions regarding current or future pricing or price standardization, procedures, discounts, credit terms, allocation of markets, unfair refusals to deal with a community member, fair profit levels, and other price related topics must be avoided at AABB meetings.
- In the event that today's discussion appears to be headed into any such areas, I will raise the issue immediately, and ask that/invite you to do the same, so that further discussion of such matters can be suspended.

Medicare Basics

Figure 1

Characteristics of the Medicare Population

NOTE: ADL is activity of daily living.

SOURCE: Kaiser Family Foundation analysis of the Centers for Medicare & Medicaid Services Medicare Current Beneficiary 2013 Cost and Use file; Urban Institute/Kaiser Family Foundation analysis of DYNASIM data, 2017 (for income and savings).

Medicare Framework

Part A

- Inpatient Hospital Services
- Skilled Nursing Facility Services
- Hospice Care
- Home Health Services

Part B

- Hospital Outpatient Services
- Physician Services
- Therapy Services
- Clinical Laboratory and Other Diagnostic Tests
- Durable Medical Equipment, Prosthetics, Orthotics, and Supplies
- Certain Drugs and Biologics

Part C

- Medicare Advantage
- Administered by private companies
- Must cover Part A and Part B services, except hospice
- Often includes Part D benefits

Part D

- Administered by private companies
- Covers certain prescription drugs

Figure 2

Medicare Benefit Payments by Type of Service, 2016

Total Medicare Benefit Payments, 2016: \$675 billion

NOTE: * Consists of Medicare benefit spending on hospice, durable medical equipment, Part B drugs, outpatient dialysis, outpatient therapy, ambulance, lab, community mental health center, rural health clinic, federally qualified health center, and other Part B services.

SOURCE: Congressional Budget Office, June 2017 Medicare Baseline.

Medicare Coverage

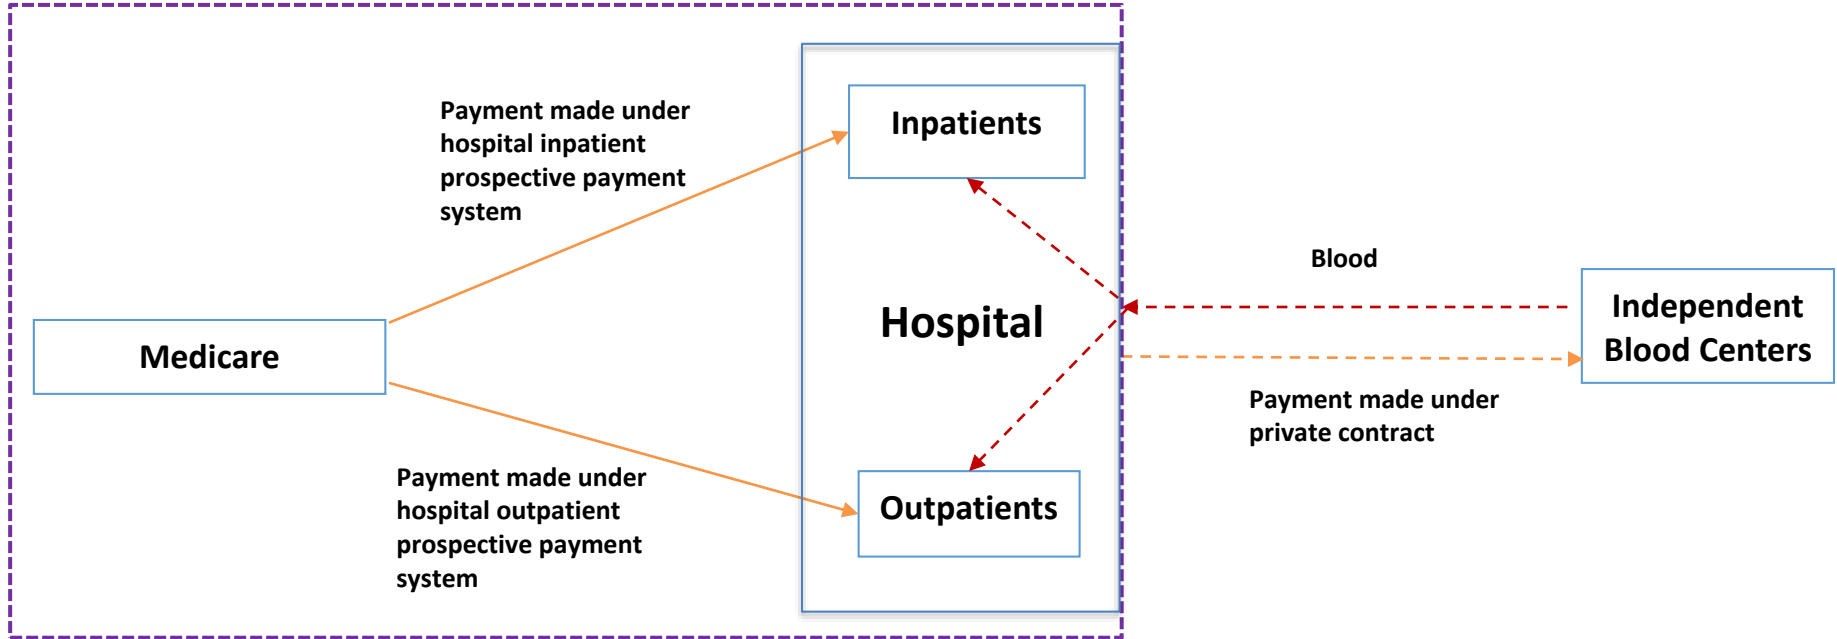

- Medicare covers and pays for items and services that are “**reasonable and necessary**” for the diagnosis or treatment of an illness or injury, or to improve the functioning of a malformed body member.”
- Medically necessary blood transfusion is generally a Medicare covered service under Medicare Parts A and B.

Payment for Blood

Unused Blood

- Hospitals cannot bill Medicare for blood that has not been transfused.
- For unused blood:
 - Processing and storage costs incurred by community blood bank and the hospital:
 - Cannot be charged to the beneficiary.
 - Can be reported as costs under cost centers for blood on hospital's Medicare Cost Report.
 - Hospitals can bill for certain patient-specific blood preparation costs (i.e., blood typing and cross-matching).
 - Hospitals can bill for splitting or irradiating a blood product with the specific intent of transfusion to a beneficiary.
 - Hospitals may not bill for the HCPCS code for the blood product that was not transfused.
 - Hospitals cannot bill for splitting or irradiating and storing a blood product without specific intent to administer it to a beneficiary at the time of splitting or irradiation.
 - No service to report.

Medicare: Hospital Outpatient Services

Payment for Blood Furnished to Hospital Outpatients

- Specific blood product APCs
 - Each blood HCPCS code is assigned to an APC
 - Payment rates include costs of blood and blood products, as well as costs for collecting, processing and storage of blood and blood products
- Payment rates determined using blood-specific cost-to-charge ratio
 - Ratio of the cost divided by the charges
 - Uses actual or simulated CCRs from most recently available hospital cost reports
- Payment rates updated annually

Professional (Physician) Billing

- Claims for physician services must be billed with an appropriate CPT code (= level I HCPCS code) to describe the service.

CPT	APC	Descriptor
38205	*	Blood-derived hematopoietic progenitor cell harvesting for transplant: allogeneic
38206	5242	Blood-derived hematopoietic progenitor cell harvesting for transplant: autologous
36511	5242	Therapeutic apheresis; for white blood cells
36512	5242	Therapeutic apheresis; for red blood cells
36513	5241	Therapeutic apheresis; for platelets
36514	5242	Therapeutic apheresis; for plasma pheresis
36516	5243	Therapeutic apheresis; with extracorporeal selective adsorption or selective filtration and plasma reinfusion
36522	5243	Photopheresis, extracorporeal
86077	5732	Blood bank physician services: difficult crossmatch and/or evaluation of irregular antibody(s), interpretation and written report.
86078	5672	Investigation of transfusion reaction including suspicion of transmissible disease, interpretation and written report.
86079	5671	Authorization for deviation from standard blood banking procedures (e.g. use of outdated blood, transfusion of Rh incompatible units), with written report.

Professional (Physician) Billing

- Each CPT code has a fee associated with it that is based on:
 - The physician work (effort)
 - Practice expenses
 - Liability costs required for that particular service
 - Adjustment for geographic variations associated with medical practice.

86077

- Interpretation of irregular red cell alloantibodies from antibody panels.
 - When red cells cannot be safely released without the review of a physician or when it is part of the laboratory policy to have a pathologist interpret incompatible crossmatches, etc.
 - Blood bank physician interpretation and / or recommendation for future transfusions for:
 - Red cell alloantibody panels
 - ABO discrepancies
 - Work-up of positive DATs in hemolytic disease of the newborn
 - Prenatal workup for Rh immune globulin administration

86078

- Evaluation of reported transfusion reactions includes:
 - Review of the patient's clinical history and events before and after the adverse reaction
 - Evaluation of post-reaction blood bank evaluation (e.g. visual inspection, clerical check) and laboratory studies (e.g. post-transfusion DAT, urinalysis, LDH, haptoglobin)
 - Impression of the underlying cause of the reaction or differential diagnosis
 - Recommendation for the treatment of the adverse reaction
 - Recommendation for future transfusions, which includes comments on prophylaxis or special product modifications

86079

- Use of Special Blood Products
- Medical consultation when a physician requests special products, which may or may not be part of hospital or laboratory policy or are contraindicated
- Includes reports / recommendations for:
 - Transfusion of mismatched Rh products (i.e. Rh positive products to an Rh negative patient)
 - Irradiated products
 - Components for transplants when the donor and recipient have different ABO types
 - Use of blood beyond its normal expiration time

Professional (Physician) Billing in Apheresis

- Medicare and some private insurers reimburse physicians for inpatient and outpatient care according to a resource-based relative value scale (RBRVS) fee schedule.
 - CMS publishes the Physician Fee Schedule, updated annually
- Billing for inpatient stays are based on Diagnostic Related Groups (DRGs)
 - Modifiers can be used to increase reimbursement, if justified based on documentation (e.g. complications)
 - Separate billing for physician services is not allowed

Therapeutic Apheresis Codes

- Coding for apheresis services varies depending on whether it is a therapeutic procedure or donor collection.
- Different types of therapeutic apheresis involve different levels of work & so are assigned different RVUs.

CPT Code	APC	DESCRIPTION	Work RVU 2018
36511	5242	Therapeutic apheresis; for white blood cells	2.00
36512	5242	Therapeutic apheresis; for red blood cells	2.00
36513	5241	Therapeutic apheresis; for platelets	2.00
36514	5242	Therapeutic apheresis; for plasmapheresis	1.81
36516	5243	Therapeutic apheresis; with extracorporeal selective adsorption or selective filtration and plasma reinfusion (ie, LDL apheresis)	1.56
36522	5243	Photopheresis, extracorporeal	1.75

Stem Cell Apheresis Codes

- Other costs for services necessary for a stem cell transplant are part of the reimbursement for the transplant (separate from the collection code)

CPT	APC	DESCRIPTION	Work RVU 2018
38205	*	Blood-derived hematopoietic progenitor cell harvesting for transplant: allogeneic	1.50
38206	5242	Blood-derived hematopoietic progenitor cell harvesting for transplant: autologous	1.50

Immune Effector Cells

- CMS only offers codes for products that are FDA-approved
- HCPCS codes include:
 - Collection
 - Processing
 - Infusion

HCPCS Code	APC	Short Descriptor
Q2040	9081	Tisagenlecleucel* car-pos t
Q2041	9035	Axicabtagene ciloleucel** car+

Questions?

- Thank you!

Excerpt from 'An Ode to a Code'

You might think water skiing's fun
ICD sees it differently, son.
They imagine things dire
Like skis catching fire
Thank goodness there's a code for that one!

V91.07XA Burn due to water-skis on fire, initial encounter

Love fishing? What could go wrong?
For ICD-10, it doesn't take long
For your boat to be crushed
All its passengers flushed
Submerged, drowned, and gone.

V90.32XA Drowning and submersion due to falling or jumping
from crushed fishing boat, initial encounter

Introduction to Reimbursement for Transfusion Medicine, Blood Products and Cellular Therapy Services

Faculty Disclosures

The following faculty have no relevant financial relationships to disclose:

- Leah Stone JD
- Mary Berg MD

The following faculty have a relevant financial relationship:

- Suzanne Butch
MLS(ASCP)SBBCM
Cardinal Health: Stock
Shareholder (self- managed)
BC Solutions: Consultant
Becton Dickinson: Stock
Shareholder (self-managed)

Learning Objectives

- Describe the Medicare program and payment policies
- Explain general reimbursement principles related to transfusion medicine services and blood products
- Explain basic reimbursement principles related to cellular therapies
